Abstract

The State Governments maintain law and order, administer justice, build up social and economic infrastructure and ensure a social safety net for the poor. Tamil Nadu has been subsidizing the provision of power, food, health services and nutrition and education with the overall welfare perspective in mind. The Consolidated Fund is the principal head in which resources flow and expenditures are incurred under the Revenue Account and Capital Account of the Fund. There was a turn round in the Revenue Account from deficit to surplus because Revenue Receipts exceeded the Revenue Expenditure during 2011-12. Non-Tax Revenue is comprised of State's Own Non-Tax Revenue and Grants-in-Aid from the Central Government. Grants-in-Aid accounted for 54 percent and State's Own Non-Tax Revenue 46 percent. There was a fall in non-tax revenue during 2009-10 because of the decline in the quantum of grants-in-aid from the Centre as well as the receipts from own non-tax revenue. Among these two components' the decline was more pronounced in grants-in-aid (22.7%) as compared to own non-tax revenue receipts (12%). In the subsequent years, non-tax revenue registered increases ranged between 0.6 percent in 2012-13 to 29.9 percent in 2013-14. The main problem of Tamil Nadu is that the growth rate of Tax Revenues is very slow growth. In the backdrop of sluggish economic growth that witnessed both at all India and in Tamil Nadu, the 12th Five Year Plan as well as Annual Plan had been formulated in the State. All India had an average growth rate of 8 percent during the same period.

Keywords: *Tax Revenue, Non-Tax Revenue, Economic Development*

Introduction

In a growing economy the role and functions of the State Government have been expanding both in terms of more extensive coverage and in terms of intensity. The responsibility of delivering many resources intensive public services is vested with the State Governments which are also closer to the people. The State Governments maintain law and order, administer justice, build up social and economic infrastructure and ensure a social safety net for the poor. Tamil Nadu has also been subsidizing the provision of power, food, health services and nutrition and education with the overall welfare perspective in mind. The Consolidated Fund is the principal head in which resources flow and expenditures are incurred under the Revenue Account and Capital Account of the Fund. There was a turn round in the Revenue Account from deficit to surplus because Revenue Receipts exceeded the Revenue Expenditure during 2011-12.¹ It is the main

source of fiscal imbalance with serious implications for public investment and growth of the economy. The revenue surplus in the subsequent period mirrors fiscal correction. It is a change for the better because fiscal situation had really bettered compared to earlier years. However, the slowdown in growth at the all India level has affected the revenue receipts in 2013-14, narrowing the revenue account surplus. The Capital Account deals with assets created in the form of capital expenditure and outstanding loans receivable by the Government. All through the years, it has exhibited a deficit which is desirable as it represents an excess of capital investment over capital receipts.² Non-Tax Revenue is comprised of State's Own Non-Tax Revenue and Grants-in-Aid from the Central Government. Grants-in-Aid accounted for 54 percent and State's Own Non-Tax Revenue 46 percent. There was a fall in non-tax revenue during 2009-10 because of the decline in the quantum of grants-in-aid from the Centre as well as the receipts

from own non-tax revenue. During 2009-10 and 2010-11 the receipts from State's own non-tax revenue had declined. The fall in 2009-10 was mainly on account of the decline in receipts originated in economic services and in 2010-11 it was mainly due to fall in interest receipts and dividends and profits. According to Dalton, "is concerned with the income and expenditure of public authorities and with the adjustment of one to the other, adjustment not necessarily to equality, but to whatever arithmetical relationship. A series of additional resources mobilization measures taken by the State has helped to sustain and improve its own tax revenue base."¹

Non-Tax Revenue: Non-Tax Revenue is comprised of State's Own Non-Tax Revenue and Grants-in-Aid from the Central Government. Grants-in-Aid accounted for 54 percent and State's Own Non-Tax Revenue 46 percent. There was a fall in non-tax revenue during 2009-10 because of the decline in the quantum of grants-in-aid from the Centre as well as the receipts from own non-tax revenue. Among these two components the decline was more pronounced in grants-in-aid (22.7%) as compared to own non-tax revenue receipts (12%). In the

subsequent years, non-tax revenue registered increases ranged between 0.6 percent in 2012-13 to 29.9 percent in 2013-14. On an average during the five year period ending 2013-14 the revenue realization from this source registered a growth rate of 6.9 percent. In the State's total revenue receipts the share of non-tax revenue witnessed a steady decline. On an average during the five year period 2009-10 to 2013-14 its share in total revenue receipts worked out to 15.6 percent. It's ratio to GSDP more or less remained constant at 2.0 percent.⁴

Conclusion

It is concluded from the analysis that the Tax Revenues is mounting. The main problem of Tamil Nadu is that the growth rate of Tax Revenues is very slow growth. In the backdrop of sluggish economic growth that witnessed both at all India and in Tamil Nadu, the 12th Five Year Plan as well as Annual Plan had been formulated in the State. All India had an average growth rate of 8 percent during the same period. The targeted growth rate in Tamil Nadu could not be achieved in all the sectors viz. agriculture, manufacturing and services and this could be attributed to fallout of global economic crisis, erratic and inadequate monsoon rains, rising oil prices, shortage of power and lack of demand in export-oriented industries.³ Therefore, it is absolutely necessary to speed up the rate of growth of Tamil Nadu economy so as to make the increase the revenue service.
