### **ABSTRACT:**

Introduction of GST will make indirect tax reform more easy and efficient. By consolidating a huge figure of central & state taxes into a solitary tax and permitting the discharge of taxes at an earlier stage, it would soften the sinful effect of tiring and cover the method for a mutual nationwide marketplace. Certain provided encouraging feedback and others providing bad criticism. Taxes may be burdensome to some as they outcome in greater value for goods and services. The study was conducted to find out how much awareness and knowledge students have about the application of Goods and services tax. The sample consisted of 60 students from different backgrounds and years of study. The choice was made at random, but there is a chance that it will be something you like. It's a problem if people are still confused or ignorant about GST taxation, and it gets worse when publics don't pay taxes. Goods and Services tax is a common government project that is debated by people every period. Students may be aware of the program but may not know how it works.

**Abstract:** Cryptocurrencies are among the more secure long-term investments, according to the majority of Indian investors. Likewise, over 115 million Indians, or 15% of the population, between the ages of 18 and 60, possess cryptocurrencies or, for the most part, have exchanged them in the last six months. Because of this, Indian investors believe that cryptocurrencies are among the safest long-term investments. The study primarily examines the interactions and complex relationships between the Indian stock market's indices and the indices for
